## Summary

As a full stack web developer I always try to understand what actually your need and requirement. And How I developed your project. Then I find the better solution for your project. After finding the best solution I start the project and finished the  project step by step.

## Featured Projects

### Amazon Clone

In this Amazon clone project, I used the all latest technologies like Next.js, NextAuth, Redux-Toolkit, Tailwind CSS, Stripe, and a suite of other innovative tools. Some key features includes:

- **Fully responsive design using tailwind css**
- **Landing page with react-responsive-carousel.**
- **Sign in and sign out authentication with Nextauth using O-auth**
- **Products rendering using Nextjs fetch functionality.**
- **Dynamic cart and favorite product page added.**
- **Store maintained using Redux-Toolkit in real-time.**
- **Payment checkout handled by stripejs.**
